

Sensory Manager Role

As Sensory Manager, you will be joining a dynamic team of sensory scientists.

Using your sensory expertise, you will be working on major projects for some of the world's biggest food and drink manufacturers.

Your role will entail:

- sensory panel management
- management of panel quality and development of our sensory panel skills base
- implementation of QDA and difference testing approaches
- project analysis (including statistical analyses such as ANOVA, PCA mapping, preference mapping and PLS modelling), reporting and presenting.

The role is client facing and you should have good interpersonal skills, as well as being a good communicator.

Although this position is Sensory focussed, we are a small agency and you will have the opportunity to branch out into a more consumer facing role as time goes by (including an International element).

Our ideal candidate will have some experience of sensory panel management, as well as conducting QDA profiling and difference tests. Knowledge and/or experience of rapid profiling techniques would also be useful.

The ideal candidate will also have some experience of consumer product testing, as well as being able to bring together consumer and sensory data using preference mapping and PLS Modelling.

You should also be a team worker, highly organised with good communication skills.

Fluency in spoken and written English is essential.
